☐ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

see attached (1 page)

An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

Anthony V.S. England
(Applicant/Applicant's Representative Signature)

(Examiner/SPE Signature)

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Agenda Accompanying Interview Request 6/9/2004
for Discussion in Telephone Interview
AUS920000492US1

09/666,274
Filing date: 9/21/2000

Attorney wishes to discuss how the following arrangement differs from the references cited in the first Office action and determine if the Examiner feels the amended claims sufficiently distinguish the present invention:

An agent receives an e-mail message. If the message does not have a certain pass generated earlier by the agent, the agent generates a pass and makes it available to the sender for the sender to return in a return e-mail message. The pass has an encrypted version of the sender's address, so the agent can determine by decrypting the message whether the pass is the one the agent generated. Also, the agent can compare the decrypted address in the pass returned by the sender to the sender's address for the return message.
